Appendix B:

Wetland & Forest Food Webs

WETLAND ECOSYSTEM

Examine the list of organisms provided, and draw a food web in the space below - include arrows to indicate the energy transfer between trophic levels

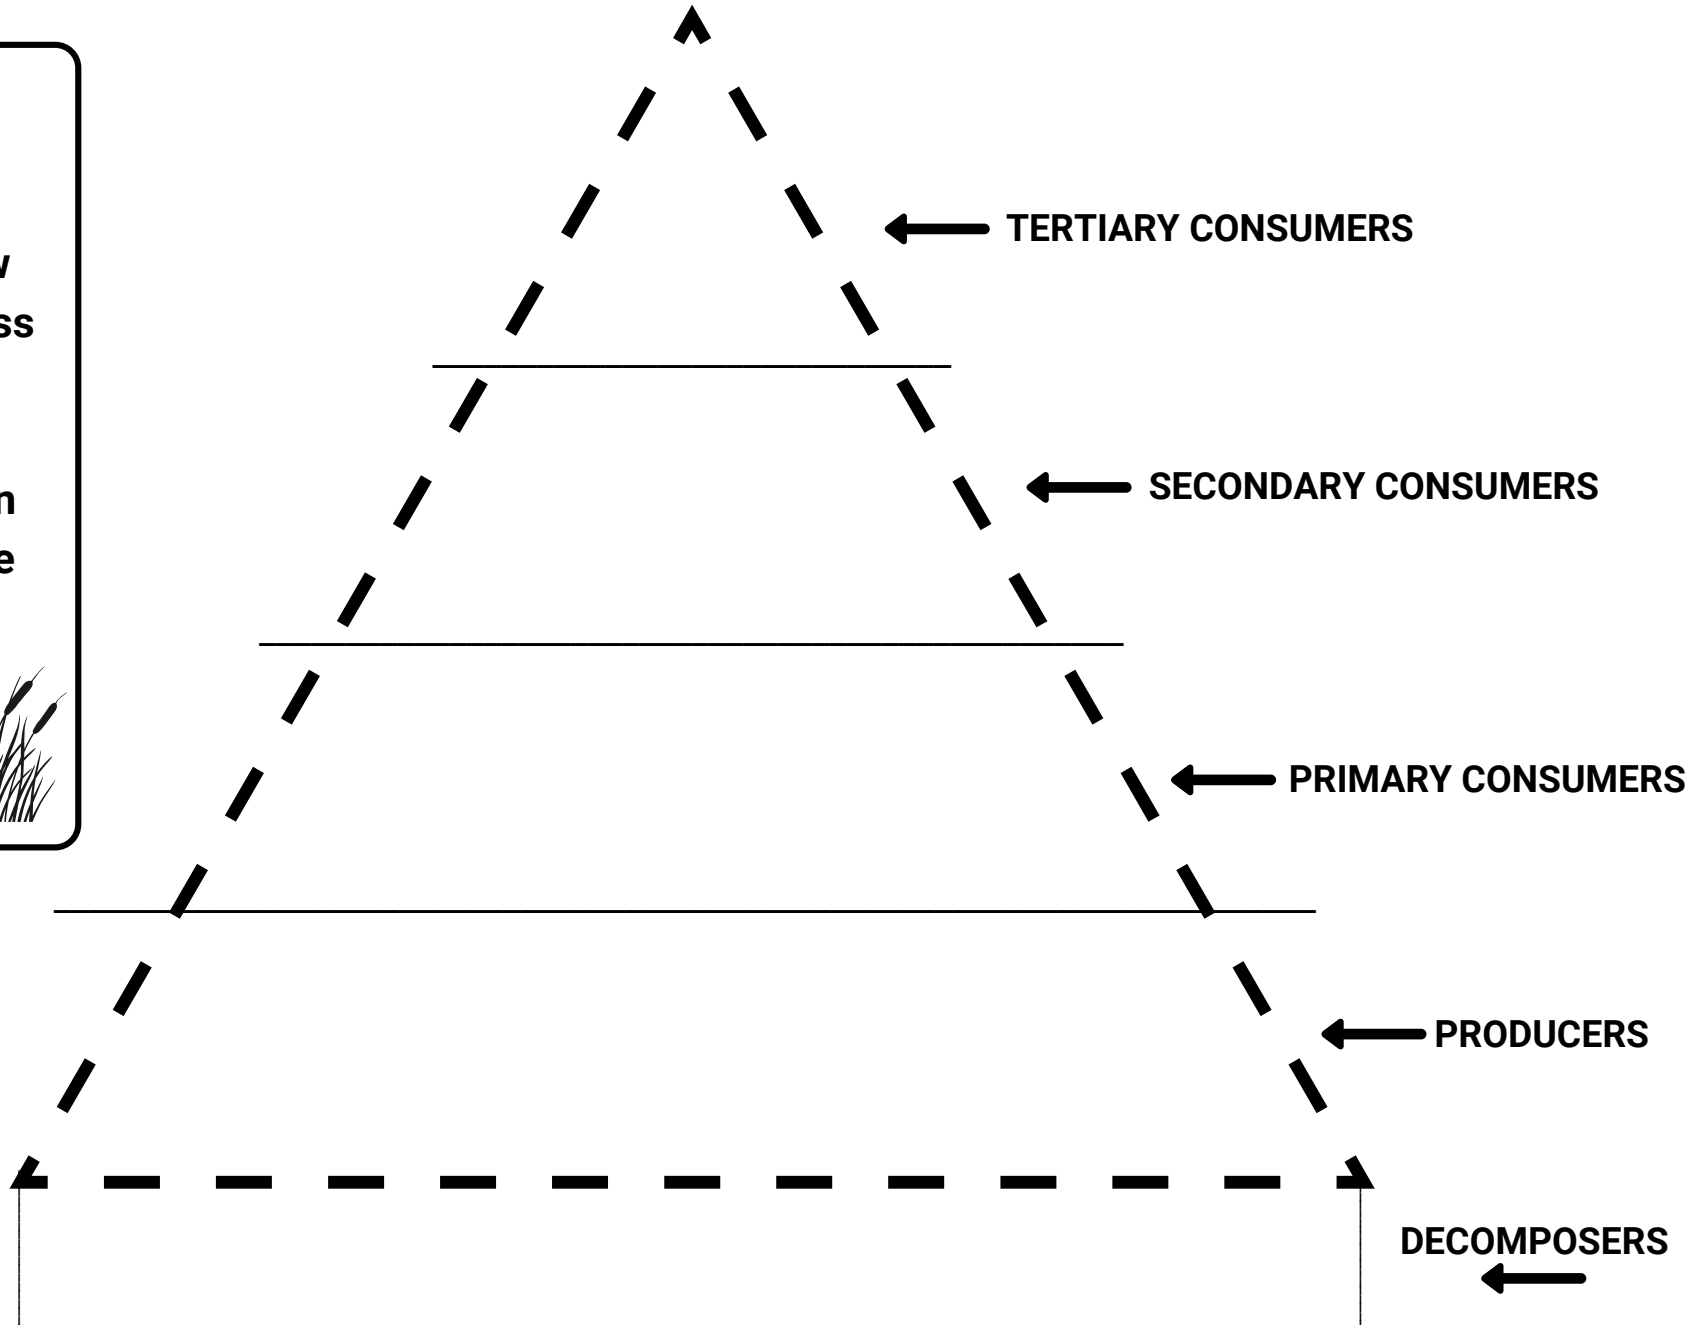

- muskellunge
- osprey
- phytoplankton
- fathead minnow
- large mouth bass
- snapping turtle
- duckweed
- great blue heron
- caddis fly larvae
- mink

WETLAND ECOSYSTEM

Place the organisms from your food web into the pyramid below according to trophic level - some species may occupy multiple trophic levels

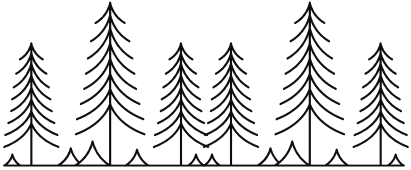

- muskellunge
- osprey
- phytoplankton
- fathead minnow
- large mouth bass
- snapping turtle
- duckweed
- great blue heron
- caddis fly larvae
- mink

FOREST ECOSYSTEM

Examine the list of organisms provided, and draw a food web in the space below - include arrows to indicate the energy transfer between trophic levels

- garter snake
- wolf
- fungi
- red squirrel
- white-tailed deer
- eastern cottontail
- red oak
- earthworm
- coyote
- white cedar

FOREST ECOSYSTEM

Examine the list of organisms provided, and place them on the pyramid below according to trophic level

- garter snake
- wolf
- fungi
- red squirrel
- white-tailed deer
- eastern cottontail
- red oak
- earthworm
- coyote
- white cedar
